DOMAPG-JAN20
Pop-Up 3D Vignette Bouquet

Create this vignette bouquet of flowers, perfect for
Valentine's Day, Mother's Day, birthday or any special day!

BUILDING YOUR POP UP 3D VIGNETTE BOUQUET

- Feel free to build the flowers any way you'd like. The flowers shown here were layered with foam squares to add depth.

- **Tip:** When attaching the flowers to the stems, place the flowers in the first vignette row at a lower placement on the stem, then attach the flowers higher for each succeeding row, creating a fuller bouquet.

- You will need to create at least 18 flowers. **Tip:** die cut all the flowers with your color choices and you will have a lot of combinations to choose from - if you have extra, you will be ready to create your next bouquet!

- Layer the heart dies and make those your flowers!

BUILDING THE STEMS FOR YOUR POP UP 3D VIGNETTE BOUQUET

- There are numbers that deboss from the die onto your stems and stem base die cuts.

- Cut out 4 sets of the stems and stem bases; we alternated between the two 5 stem and two 4 stem bases to vary the placement of the flowers.

- The 5 stem base has specific numbers that match to the stems. Note where the stem is "backwards", it means to flip the die cut so it will work in the opposite direction.

- For the 4 stem base, the 2 outer stems do not have a number. That is to allow you to mix and match and vary how you want these outer flowers be placed for your bouquet. Any of the stems numbered 2, 3 or 4 will work.

- You will need a total of 18 stems.

- If using 80# cardstock, the stems may lean with the weight of the flowers; to make the stems sturdier, use either heavier cardstock or glue 2 die cut stems together before attaching to the stem base.
